Statement Title

Genç İz Academy

Statement (600 words limit)

Genç İz (Young Track) Academy, is a student association composed of female student volunteers. Our Academy has been operating academic protocols and cooperation agreements signed with some particular universities since 2013. Within one year it is carried out so many projects, courses, seminars, conferences and trips by providing services to university students. The academie's number of volunteers reached over 496, brought a different dimension to this type of organization.

In this globalizing world, our main goal is to support college women to get high awareness, sensitiveness, respect to different values, to develop themselves in academic and social areas. Genç İz Academy serves for career, academia, culture and civilization platforms and incorporates more than 20 clubs, such as; social responsibility, art, language, peace bridges, science and faith, media club and etc...

Social responsibility club is the most prominent of all. With projects carried out by large segments of society, has contributed to human values in community.

With the "Reading Festival", the university students are aimed to gain reading habits, contributing them to have conscious, to get intellectual point of view and become the individuals that have high perception power.

By the social responsibility projects like, "Our brothers are chills" and "Burning Hearts Not Mine" taking our conscience as pioneer, victims of mine disaster and the Van earthquake we have had to bring spiritual support and various aids. We also provide organizations with institutions engaged in this work.

"Selsebil wells" is our biggest project that aspired to service of humanity and cultural interaction supported by Genç İz Academy. With this project, not only as a citizen of Turkey, but also as a citizen of the world, we intend struggle against human's thirst by opening water wells in Africa. Apart from our country, those people have different languages, religions, colors and race, have achieved the support just for the sake of humanity. By this way, what we target is, 100 wells in 6 months. Thanks to some programs, our volunteers through social media helped to open 35 wells together with 'Kimse Yok Mu' institution. As of now, our 31 wells has already under construction.

With our social responsibility projects, as Genç İz Academy, we want to establish a bridge between global peace and mankind, and we still have our efforts in this direction.
